

Scott Roberts

Completed 164 labs earning 15680 points.

Activity Report

Date	Lab	Description	Points Earned
2026-03-25	Staying Safe Online: Why Information Security is Everyone's Business	Recognize the importance of information security	10
2023-11-22	CVE-2019-0708 (BlueKeep: Snort Rule)	Apply principles of how security teams may update systems in preparation for known threats	100
2023-11-16	CVE-2019-17387 (Aviatrix VPN Client Privilege Escalation)	Exploit CVE-2019-17387 to escalate privileges	200
2023-11-16	Incident Response: Suspicious Email – Evidence of Compromise	Investigate host-based compromise and IOCs	400
2023-11-15	Digital Forensics: Using file	Using file to identify true information about unusual looking files	100
2023-11-15	Cyber 101: Cookies	Recognize how cookies are used by organizations	20
2023-11-15	Digital Forensics: Timestamping	Gain an understanding of the MFT	300
2023-11-15	Digital Forensics: National Software Reference Library (NSRL)	Use the national software reference library	100
2023-11-15	Packet Analysis: Packet Capture Basics	Analyze network packet captures	100
2023-11-14	Guidance on Remote Working	Identify the risks associated with remote working	10

Activity Report Page 2 of 12

Date	Lab	Description	Points Earned
2023-11-14	Security On The Go	Recognize the security risks of using devices when away from the office	10
2023-11-14	Privileged Access	Recall what privileged access is and why it's an attractive target for attackers	10
2023-11-14	Physical Security	Identify common physical security risks	10
2023-11-14	Disposal of Device Information	Recognize why secure device disposal is core to an organization's information management process	10
2023-11-14	Virtualization	Describe the uses and advantages of virtualization	10
2023-11-14	Platform as a Service (PaaS)	Be able to explain the advantages and disadvantages of Platform as a Service	20
2023-11-14	Spiderfoot	Scan and analyze data using specialty OSINT tools	40
2023-11-14	Open Source Intelligence (OSINT): Shodan.io	Gain an understanding of the Shodan.io search engine and how to run queries	20
2023-11-14	AWS: Introduction to Security Groups	Analyze security configuration	40
2023-11-14	Open Source Intelligence (OSINT): EXIF	Identify types of data stored in images	40
2023-11-13	CVE-2019-0708 (BlueKeep) – Offensive	Exploit BlueKeep	200
2023-11-13	Exploitation Development: Data Compression	Recognize how data compression can be used to exfiltrate data	100
2023-10-23	IoT & Embedded Devices: Supply Chain Hardware Tampering	Practice interacting with a Baseboard Management Controller	100
2023-10-23	Introduction to Active Directory Attacks: Pass-the-Hash	Gain access to a system using pass-the-hash	200
2023-10-18	Mal Wars	Analyze multiple payloads	200

Activity Report Page 3 of 12

Date	Lab	Description	Points Earned
2023-10-11	Social Engineering	Describe different social engineering attack techniques and their impacts	10
2023-10-11	Shoulder Surfing	Recognize how shoulder surfing works and the various ways it can be employed	10
2023-10-10	Practical Malware Analysis: Dynamic Analysis	Describe what dynamic analysis is and how it's used for malware analysis	40
2023-10-10	Wireshark: Stream/Object Extraction	Analyze network packet captures	200
2023-10-09	Cyber 101: Who Are The Hackers?	Recognize the different types of hackers	10
2023-10-09	Cyber 101: Why Hackers Hack	Recognize some of the methods used by hackers	10
2023-10-09	Threat Hunting: STIX	Locate Cyber Threat Information from within STIX objects	40
2023-10-09	Threat Hunting: Analyzing Sandbox Reports	Investigate malicious samples using sandbox reports	100
2023-10-08	Threat Hunting: VirusTotal	Demonstrate how to use malware analysis tools	100
2023-10-08	Threat Hunting: Introduction	Describe threat hunting concepts	40
2023-10-08	Hunting for Public S3 Buckets	Explain why public S3 buckets are often compromised	200
2023-10-07	Incident Response in the Workplace	Recall the advantages of an incident response plan	10
2023-10-07	Personal Devices in the Workplace	Recognize the risks associated with using personal devices in the workplace	10
2023-10-07	Privacy	Identify what privacy is and why it needs protecting	10
2023-10-07	History of Information Security	Recall some of the key moments for information security throughout history	10

Activity Report Page 4 of 12

Date	Lab	Description	Points Earned
2023-10-07	Information Security and Cybersecurity Terminology	Recall some key information security and cybersecurity terms and phrases	10
2023-10-07	Infrastructure Hacking: XSL Script Processing	Recognize how XSL files can obscure malicious code with embedded scripts	200
2023-10-07	Windows Concepts: CertUtil	Analyze the function of CertUtil	100
2023-10-07	Infrastructure Hacking: OpenLDAP Plaintext Passwords	Analyze an LDAP post exploitation technique	100
2023-10-07	Infrastructure Hacking: Sudo Caching	Identify exploit attempts that abuse the sudo caching technique	100
2023-10-07	Cyber 101: Security Champions	Explain what a security champion is and their purpose	10
2023-10-07	Infrastructure Hacking: Space After Filename	Inspect suspicious files and analyze their function	100
2023-10-07	Windows Concepts: Background Intelligent Transfer Service (BITS)	Gain an understanding of BITS and how it can be abused	100
2023-10-07	Windows Sysinternals: Process Explorer	Use Process Explorer effectively	100
2023-10-07	Infrastructure Hacking: SimpleHTTPServer	Use Python's SimpleHTTPServer to spawn web servers	100
2023-10-07	Practical Malware Analysis: Static Analysis	Describe what static analysis is and how it's used for malware analysis	40
2023-10-07	PoshC2: Introduction to Command and Control Frameworks	Describe command and control frameworks, their uses, and benefits	40
2023-10-07	SQL: An Introduction	Gain an understanding of the SQL language and queries	100
2023-10-07	Infrastructure Hacking: SSL Scanning	Identify weak cryptographic ciphers	200
2023-10-07	SQL Injection: sqlmap	Practice applying sqlmap to a database	200

Activity Report Page 5 of 12

Date	Lab	Description	Points Earned
2023-10-07	Nmap: Using Nmap	Recall how to run Nmap	100
2023-10-07	Rainbow Tables	Describe what a rainbow table is	40
2023-10-07	Snort Rules: HTTP	Demonstrate usage of Snort rules	300
2023-10-07	Snort Rules: DNS	Create Snort rules for DNS events	300
2023-10-07	Snort Rules: Introduction	Demonstrate proficiency in basic Snort rules	200
2023-10-07	Open Source Intelligence (OSINT): Deleted Tweet	Analyze information using open source intelligence techniques	40
2023-10-07	Credential Access: Using Hydra	Perform attacks on different network protocols	200
2023-10-07	John the Ripper	Exposure to John the Ripper tool chain	100
2023-10-07	Elastic Playground: Accounting and Audit	Identify audit and accounting methodology	200
2023-10-07	Encoding: Binary	Recall how binary functions	40
2023-10-07	Credential Access: Password Hashing and Salting Techniques	Describe the benefits of salting passwords	100
2023-10-07	Threat Hunting: Honeypots	Describe what a honeypot is	200
2023-10-07	Open Source Intelligence (OSINT): Robots.txt	Identify resources in robots.txt files	40
2023-10-07	Tor	Describe how Tor works	40
2023-10-07	Cyber 101: Cyber Kill Chain	Recognize the purpose of the cyber kill chain	10

Activity Report Page 6 of 12

Date	Lab	Description	Points Earned
2023-10-06	Introduction to Encryption	Identify different types of encryption algorithms	100
2023-10-06	Introduction to Hashing	Identify the characteristics of a good hashing algorithm	100
2023-10-06	Cyber 101: Information Security	Recognize the importance of information security for individuals and organizations	10
2023-10-06	The Bombe Machine	Recognize how the Bombe machine works	200
2023-10-06	The Typex Machine	Recognize how a Typex machine works	200
2023-10-06	Port Identification	Recognize common default port numbers and their associated services	100
2023-10-06	Incident Response: Data Exfiltration	Practice identifying instances where data has been exfiltrated	100
2023-10-06	DevSecOps: Introduction	Recall the evolution of software delivery methodologies	10
2023-10-06	Incident Response: Clipboard Data Theft	Analyze techniques used by adversaries to steal clipboard data	100
2023-10-06	OSI Model	Identify the different layers of the OSI model	40
2023-10-06	Introduction to MITRE ATT&CK®	Be familiar with the MITRE ATT&CK® framework and know how it's used	20
2023-10-06	Linux CLI: Using Find	Recognize how the find command work	200
2023-10-06	World Cup Special: It's a Game of Pong	Develop critical thinking	100
2023-10-06	Linux CLI: Using Screen	Describe how `screen` works in the CLI	100
2023-10-06	Validating SIEM Results	Identify whether an SIEM's actions are accurate in any given scenario	40

Activity Report Page 7 of 12

Date	Lab	Description	Points Earned
2023-10-06	Packet Analysis: Using tcpdump	Analyze network packet captures	200
2023-10-06	Encryption Tools: CyberChef	Recall how CyberChef functions	40
2023-10-06	PowerShell Basics: Files and Folders	Explain how to navigate around a system with PowerShell	100
2023-10-06	Wireshark: Display Filters – Introduction to Filters	Analyze network packet captures	100
2023-10-06	Wireshark: Introduction to Wireshark	Analyze network packet captures	100
2023-10-06	Introduction to Incident Response: Process	Recognize and outline the stages of the incident response process	40
2023-10-06	Linux CLI: Searching and Sorting	Employ searching techniques to find patterns in files	100
2023-10-06	Linux CLI: Combining Commands	Identify the different ways of combining commands on the terminal	200
2023-10-06	SMTP Log Analysis	Carry out a log analysis to identify particular information	100
2023-10-06	Windows Concepts: Scheduled Tasks	Demonstrate how to navigate information in Windows Scheduled Tasks	100
2023-10-06	Windows Concepts: Windows Registry	Evaluate registry values	100
2023-10-06	Linux CLI: Generating File Hashes	Recognize file hashes	100
2023-10-06	Intrusion Detection Systems	Recognize what an IDS is and how they're used	20
2023-10-06	Symmetric vs Asymmetric Key Encryption	Apply symmetric key encryption and decryption techniques	100
2023-10-06	Modern Encryption: MD5 Hashing	Recall what MD5 hashing is and how it works	100

Activity Report Page 8 of 12

Date	Lab	Description	Points Earned
2023-10-06	Modern Encryption: SHA-1 Hashes	Recall what SHA-1 hashing is and how it works	100
2023-10-06	Caesar Ciphers	Recall how Caesar cipher encoding works	40
2023-10-06	IoT & Embedded Devices: Best Practice	Describe how to securely deploy IoT devices	10
2023-10-06	IoT & Embedded Devices: Hardware Reverse Engineering	Identify security best practices for IoT devices	10
2023-10-06	IoT and Embedded Devices: Network Protocols and Security	Express the importance of using encryption to secure communications	10
2023-10-06	IoT & Embedded Devices: Security Issues	Identify security best practice for IoT devices	10
2023-10-06	IoT & Embedded Devices: What Is IoT?	Recognize IoT devices and their associated risks	10
2023-10-06	Intro to Web App Hacking: Directory Traversal	Conduct directory traversal attacks against a web server	200
2023-10-06	Intro to Web App Hacking: Bypassing HTTP Client-Side Controls	Recognize some common insecure user access controls that can be found in web applications	200
2023-10-06	Log Finder	Perform web log analysis	100
2023-10-04	The Enigma Machine	Recall how the Enigma machine works	200
2023-10-04	MongoDB: An Introduction	A basic understanding of NoSQL Databases	100
2023-10-04	Cross-Site Scripting: Stored XSS	Identify stored cross-site scripting vulnerabilities in a web application	200
2023-10-04	Burp Suite Basics: HTTPS	Configure and use Burp Suite with Firefox	100
2023-10-04	Cross-Site Scripting: Reflected XSS	Identify reflected cross-site scripting vulnerabilities in a web application	200

Activity Report Page 9 of 12

Date	Lab	Description	Points Earned
2023-10-04	PowerShell Basics: What is PowerShell?	Describe what PowerShell is	100
2023-10-04	Immersive Bank: Open Source and Credentials	Employ open-source intelligence to uncover the CEO's password	200
2023-10-04	Burp Suite Basics: Introduction	Set up and use Burp Suite with Firefox	100
2023-10-03	Practical Malware Analysis: Java RATs	Identify the file structure for a JAR application	200
2023-10-02	The Internet	Explain the history of the internet	20
2023-10-02	Introduction to Networking: IP Addresses	Recognize an IP address	40
2023-10-02	The Importance of Information Security and Cybersecurity	Describe a simulated example of a breach and recall its emotional impact	10
2023-10-02	CVE-2019-1388 (Windows Priv Esc UAC Bypass)	Bypass User Account Controls	200
2023-10-02	What Is Information Security?	Identify the workplace and personal security challenges that good information security practices help to solve	10
2023-10-02	Information Security: Starting at the Beginning	Recall the difference between information security and cybersecurity	10
2023-10-02	Protocols: HTTP – Status Codes	Develop knowledge of HTTP status codes	100
2023-10-02	Protocols: LDAP	Analyze the LDAP protocol in an enterprise context	100
2023-10-02	Protocols: ARP	Identify packet structure of ARP requests and responses	100
2023-10-02	Protocols: FTP	Explain the core concepts of the File Transfer Protocol	100
2023-10-02	Stack Overflow	Recall the risks of using code found online	10

Activity Report Page 10 of 12

Date	Lab	Description	Points Earned
2023-10-02	Port Bingo: Easy Mode	Develop your knowledge of port numbers and their services	100
2023-10-02	Scanning: DNS Zone Transfer	Analyze DNS information revealed by a zone transfer	200
2023-10-02	Incident Response: Parsing PST	Investigate email client files	200
2023-10-02	Incident Response: Suspicious Email – Initial Inspection	Investigate and gain information from suspected malicious documents.	200
2023-10-02	Ports	Identify how ports are used in modern networks	40
2023-10-02	Transport Protocols	Explain the core concepts of the the most common transport protocols	40
2023-10-02	Windows Concepts: New Technology File System (NTFS)	Analyze Windows file permissions	100
2023-10-02	Internet Protocol V4	Explain the core concepts of IPv4 addressing	100
2023-10-02	Scanning: Banner Grabbing	Identify and enumerate common services	100
2023-10-01	Introduction to Incident Response: Introduction	Describe what an incident is	40
2023-10-01	Linux CLI: Using SSH and SCP	Recall what the SSH protocol is	100
2023-09-28	Open Source Intelligence (OSINT): Cached and Archived Websites	Interpret and analyze information collected from web archives	20
2023-09-28	Digital Forensics: Windows Image Analysis	Investigate and analyze operating systems using common forensic techniques	300
2023-09-28	Intro to Web App Hacking: Page Source Review	Analyze the web application source code to recognize technologies being used	200
2023-09-28	Open Source Intelligence (OSINT): Investigator Operations Security (OPSEC)	Use OSINT techniques to gather information	40

Activity Report Page 11 of 12

Date	Lab	Description	Points Earned
2023-09-28	Open Source Intelligence (OSINT): Social Media and Privacy	Recognize the perils of having too much information on social media	10
2023-09-27	Open Source Intelligence (OSINT): Online Anonymity	Describe how to increase your online anonymity	40
2023-09-26	Linux CLI: Introduction to the Linux Command Line Interface	Recall Linux command line fundamentals	40
2023-09-26	Open Source Intelligence (OSINT): Search Engines	Recognize the difference between the surface web, deep web, and dark web	20
2023-09-26	Infrastructure Hacking: Bash History	Be able to identify the risk of passing credentials with the command line	100
2023-09-26	Linux CLI: Getting Started with the Terminal	Recall fundamental concepts of the Linux terminal	100
2023-09-26	Linux CLI: Using Sudo	Identify different user privileges in Linux	100
2023-09-26	Open Source Intelligence (OSINT): Boarding Pass	Describe what type of information a boarding pass barcode contains	100
2023-09-26	Linux CLI: File Permissions	Read Linux file permissions	100
2023-09-26	Linux CLI: Manipulating Text	Modify text within files using basic command line tools	200
2023-09-26	Staying Safe Online: Phishing Emails	Recognize the main characteristics of phishing emails	10
2023-09-26	Linux CLI: Editing Files	Be able to recall some common Linux command line text editors	100
2023-09-26	Linux CLI: Using wc	Count elements in a file using the wc tool	200
2023-09-26	Linux CLI: Stream Redirection	Describe how data can be manipulated via the terminal	100
2023-09-26	Linux CLI: Changing Things	Recall the Linux CLI commands explored in the lab	100

Activity Report Page 12 of 12

Date	Lab	Description	Points Earned
2023-09-26	Linux CLI: Moving Around	Navigate through directories on the command line	100
2023-09-26	Netcat: Connecting with Netcat	Use Netcat for various tasks	100
2023-09-26	Scanning: Network Scanning	Operate various network scanning tools to identify open ports	100
2023-09-26	Staying Safe Online: Malware	Recognize the most common forms of malware and how they can affect you	10

About Immersive

Immersive is the world's first fully interactive, on-demand, and gamified cyber skills platform. Our technology delivers challenge-based assessments and upskilling exercises which are developed by cyber experts with access to the latest threat intelligence. Our unique approach engages users of every level, so all employees can be equipped with critical skills and practical experience in real time.
